EDUCATION

Purdue University - B.S. Computer Science (Software Engineering)

Aug 2023 - May 2027

Minors: Management · Certificate in Entrepreneurship and Innovation | GPA: 3.53 | Dean's List, Semester Honors

- **Relevant coursework:** Software Engineering · Software Testing · Data Structures & Algorithms · Entrepreneurship & Innovation · Marketing Management for New Ventures · Managerial Accounting · Microeconomics

EXPERIENCE

Full-Stack Developer – Verbs & Vibes

May 2026 - Present

Next.js · Supabase/PostgreSQL · Vercel · Stripe API · Tailwind CSS

- Created a 14,000-line full stack platform for a language and culture club startup using Next.js.
- Worked with client to determine needs, translating them into specs and a finished product.
- Integrated Stripe for 4 product types with signed webhooks and idempotent fulfillment, avoiding duplicate charges.
- Built an internal admin page giving staff real-time control over classes, bookings, and waitlists.
- Used Claude Code to cut development time, shipping features faster across the full-stack build.

PROJECTS

SwiftFix – On-Demand Micro-Mobility Repair Startup Concept

February 2025 - April 2025

- Ran customer discovery interviews to build a target user profile and competitive positioning framework.
- Conducted market research across 7 campuses to support a \$15.5M TAM and \$4.8M Year 5 revenue estimate.
- Pitched market opportunity and go-to-market strategy to a stakeholder panel at the investor pitch.

Forge – Mobile Fitness & Social App

February 2026 - April 2026

React Native · TypeScript · FastAPI · SQLAlchemy · OpenAI API · Pinecone

- Collaborated within a 6-person Agile team across 3 sprints to build a full-stack AI-powered mobile fitness app.
- Developed design docs and sprint retrospectives that defined feature scope and guided iterative delivery.
- Shipped 6 features end-to-end, including in-app messaging, social feeds, and calendar-based workout scheduling.

Online Marketplace – E-Commerce Application

October 2024 - December 2024

Java · Swing · JUnit · Socket Programming · Multithreading

- Designed a Swing GUI for browsing stores, managing carts, and tracking purchase history.
- Built a multithreaded socket server in Java to handle concurrent buyer and seller sessions.
- Implemented persistent storage via object serialization to save carts across sessions.

SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, SQL, HTML/CSS

Frameworks/Libraries: React, React Native, Next.js, FastAPI, SQLAlchemy, Node.js, Express, Swing, Tailwind CSS

Tools: Supabase, Git/GitHub, JUnit, Vercel, VSCode, IntelliJ, Eclipse, Linux, Agile/Scrum, Postman, GDB, Valgrind

Product & Business: Customer Discovery, Market Research, Financial Modeling, Competitive Analysis

LEADERSHIP & ACTIVITIES

FIRST Tech Challenge Robotics Club – Lead Programmer

Sep 2020 - Apr 2023

- Led a team of 6 programmers in building real-time robot control systems; won 2nd Place Control Award at NH States.
