Bedford, NH | (603) 785 - 1599 | artembedford@gmail.com | github.com/artem-yurovskiy

EDUCATION

Purdue University - B.S. Computer Science (Software Engineering)

Aug 2023 - May 2027

Minors: Management • Certificate in Entrepreneurship and Innovation | GPA: 3.53 | Dean's List, Semester Honors

- **Relevant coursework:** Marketing Management for New Ventures • Intro to Entrepreneurship & Innovation • Data Structures & Algorithms • Software Engineering • Science Writing & Presentation • Microeconomics • Accounting

PROJECTS

SwiftFix – On-Demand Micro-Mobility Repair Startup Concept

- Conducted qualitative customer discovery interviews with target users and synthesized findings into an updated end user profile and competitive positioning framework.
- Performed market research across 7 California university campuses, analyzing competitor offerings, pricing models, and adoption patterns to support a \$15.5M beachhead TAM estimate and \$4.8M Year 5 revenue projection.
- Presented market opportunity, competitive landscape, and revenue model to a panel of stakeholders at the team's investor pitch, translating research findings into actionable product and go-to-market recommendations.

Forge – Mobile Fitness & Social App

React Native • TypeScript • Expo • FastAPI • SQLAlchemy • OpenAI API

- Worked within a 6-person Agile team across 3 sprints to develop a full-stack mobile fitness app featuring workout tracking, diet logging, social feeds, and AI-assisted fitness guidance.
- Defined and documented product features and specifications by developing user stories and acceptance criteria.
- Collaborated with cross-functional team members across frontend and backend development to deliver iterative product improvements, creating the workout calendar, push notification, and exercise guidance features.

Online Marketplace – E-Commerce Application

Java • Swing • Socket Programming • Multithreading • JUnit

- Developed a Java e-commerce marketplace supporting complete buyer and seller workflows including product listings, cart management, and purchase history.
- Built a multi-threaded server architecture from scratch using Java socket programming to handle concurrent users and maintain data consistency across sessions.

Derryfield Binary Bots – Robotics Team Website

HTML • CSS • Bootstrap

- Designed and deployed a multi-page website for FTC robotics team #12758, centralizing team information, competition history, and contact details for local teams and community outreach.

LEADERSHIP & ACTIVITIES

FIRST Tech Challenge Robotics Club – Lead Programmer

Sep 2020 - Apr 2023

- Led a team of 6 programmers in designing and debugging real-time control systems, collaborating closely with hardware and electrical subteams to translate technical requirements into software.
- Awarded 2nd Place Control Award at the NH State Championship for sensor-driven robot control and autonomous software performance.

SKILLS

Technical

Python, TypeScript, JavaScript, Java, C, SQL, HTML/CSS, React Native, FastAPI, SQLAlchemy

Product & Research

Customer Discovery, Market Research, Financial Modeling, Competitive Analysis, Agile/Scrum
